MCQ Distract Generator

Presented By:

Syed.Afrin(24ME1A54B1)
R.SumaSree(24ME1A54A2)
T.Harshini(24ME1A54B6)
N.Vijaya(25ME1A5408)

Presented To:

Training and Placements Department

Agenda

02 Introduction

03 Problem Statement

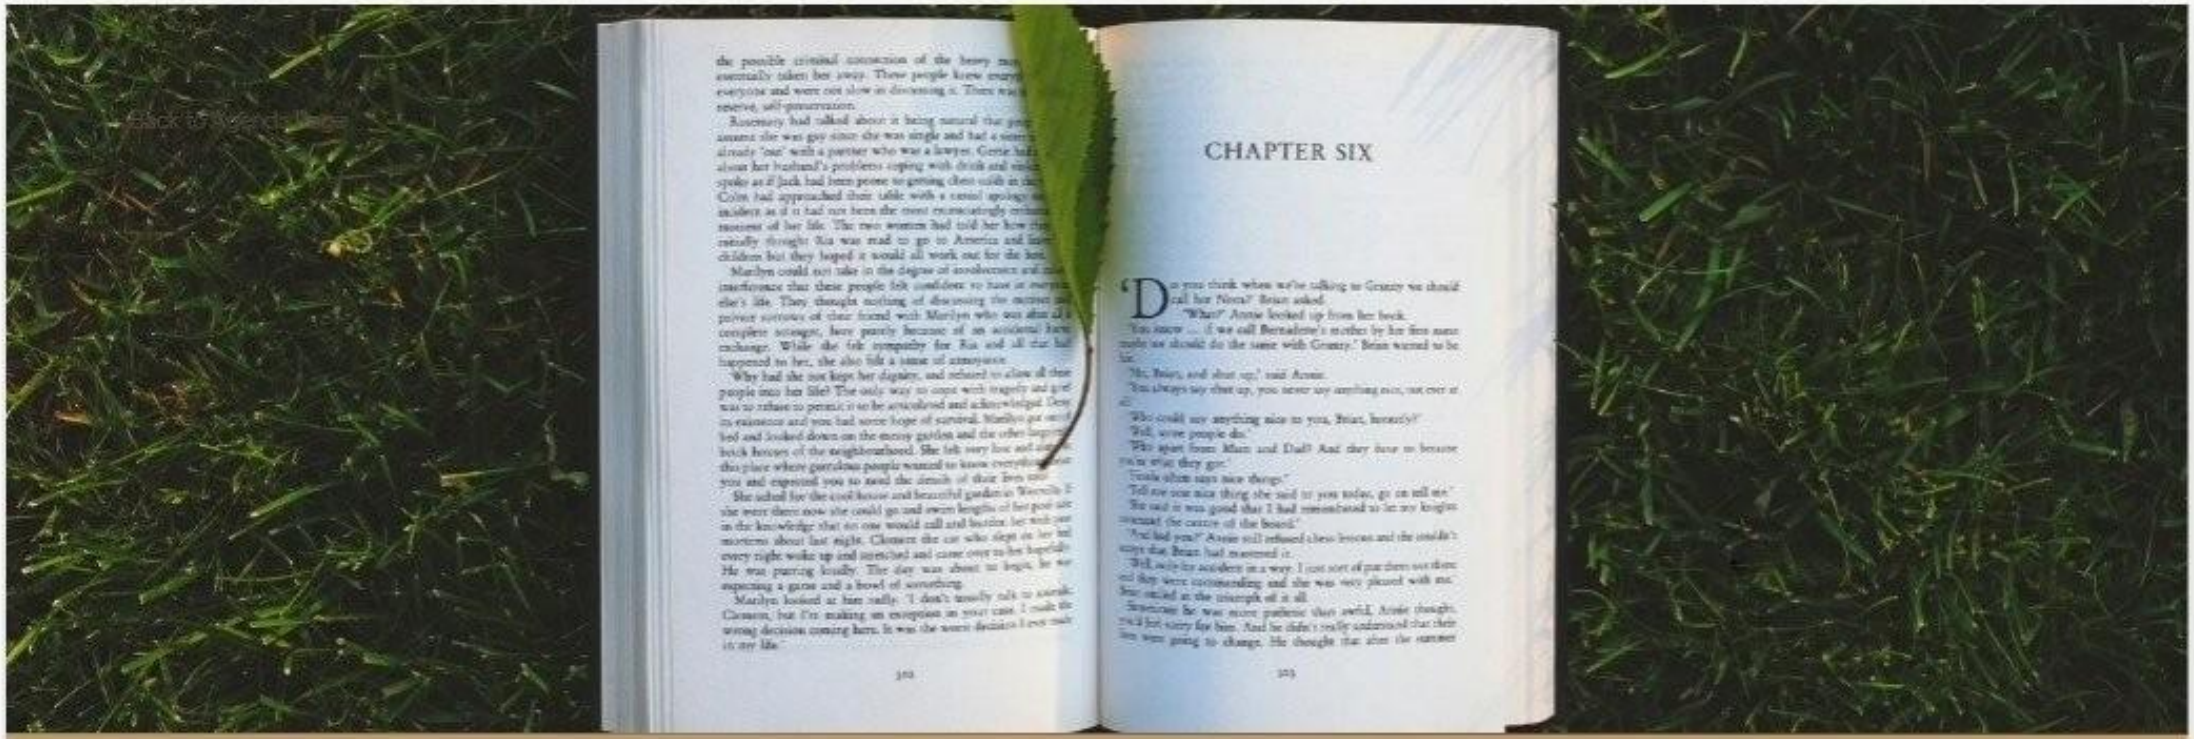
04 Objective

05 Methodology

06 System Architecture

07 Example & Advantages

08 Conclusion & Future Scope



Introduction

- MCQs are widely used in exams and online assessments
- Quality depends on effective distractors (incorrect options)
- Weak distractors reduce question difficulty
- Manual creation is time-consuming

Problem Statement

Automatically generate meaningful distractors for multiple choice questions.

Objectives and Goals

Goal # 1

Generate relevant and meaningful distractors.

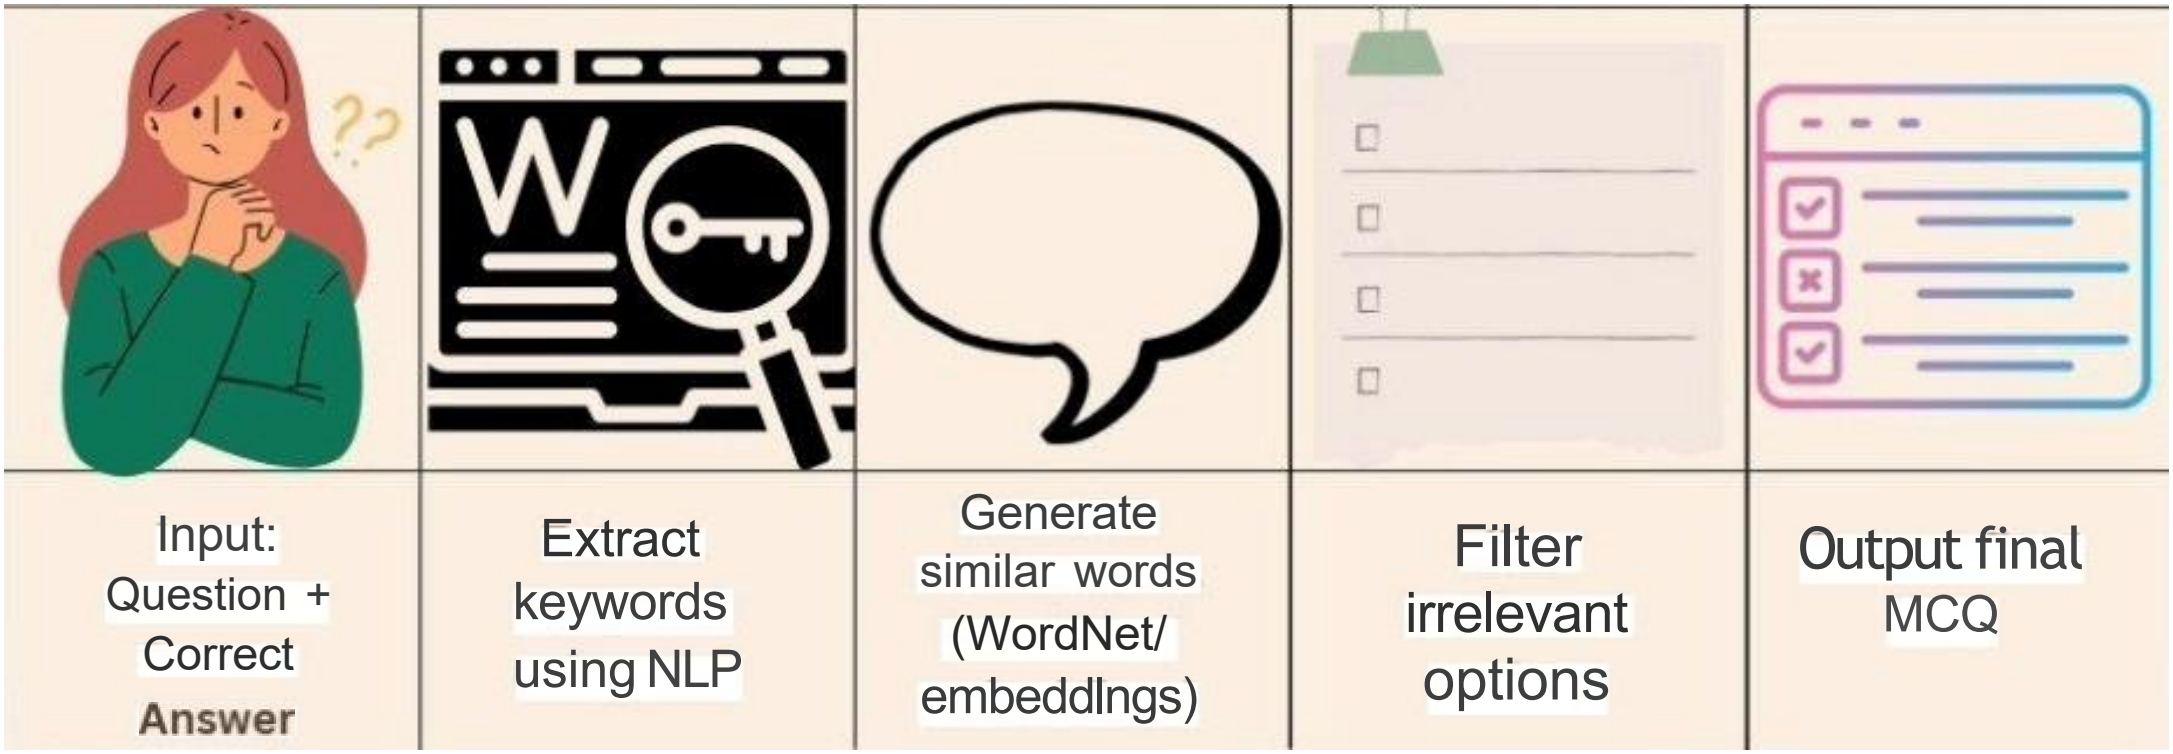
Goal # 2

Automate MCQ option generation to save time.

Goal # 3

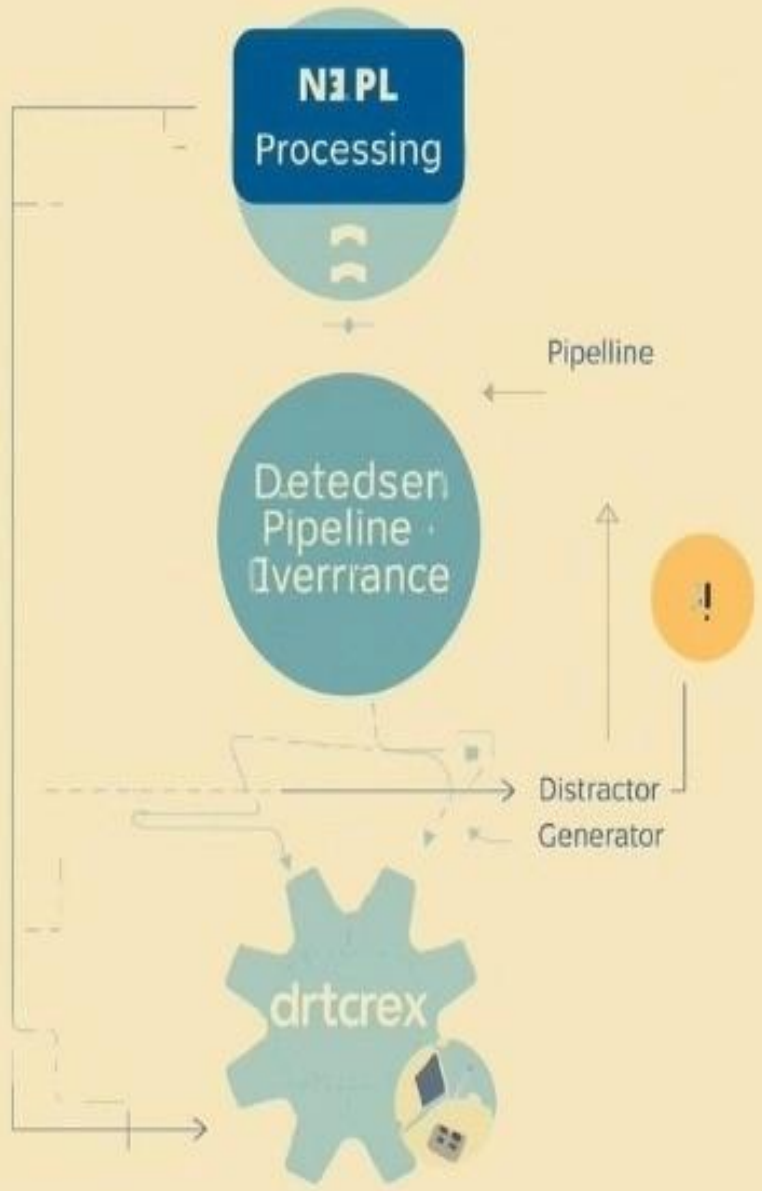
Improve assessment quality with better options.

Methodology



System Architecture

- Input Module
- NLP Processing Module
- Distractor Generation Module
- Output Module



EXAMPLE

Q: Capital of India?

Ans: New Delhi

DISTRACTORS:

- MUMBAI
- CHENNAI
- KOLKATA

ADVANTAGES

- Saves time
- Improves MCQ quality
- Scalable
- Reduces manual effort

Conclusion

- Automates distractor generation
- Enhances learning & evaluation

FUTURE SCOPE

- Use advanced AI model
- Multi-language support
- Difficulty-level control
- Integration with e-learning platforms

THANK YOU
